

BENEDICT ARINZE BELOLISAH

FULL-STACK SOFTWARE DEVELOPER

Lagos, Nigeria | +234 906 708 4003 | realvoclain@gmail.com
github.com/Voclain1

PROFESSIONAL SUMMARY

Full-stack software developer with freelance web delivery experience since 2022 and 40+ websites and web projects delivered. Builds TypeScript applications with React, Next.js, NestJS and PostgreSQL, including school-management workflows, API-driven products and payment integrations. Combines product development with responsive interface design, WordPress delivery, performance optimisation and technical SEO.

PROFESSIONAL EXPERIENCE

Freelance Web Developer | 2022-Present

- Designed and developed 40+ responsive websites and web projects for clients across multiple industries, using WordPress, Elementor and modern web technologies.
- Translated client requirements into mobile-responsive interfaces and managed implementation, launch and handover.
- Provided maintenance, security updates, troubleshooting, performance optimisation and technical SEO improvements.
- Managed client communication, timelines and concurrent deliverables independently.

TECHNICAL SKILLS

Frontend: TypeScript, JavaScript, React, Next.js, HTML5, CSS3, Tailwind CSS

Backend & data: Node.js, NestJS, REST APIs, PostgreSQL, Prisma, Redis, BullMQ

Integrations: Paystack, authentication, webhooks, external data APIs, AI APIs

Delivery: Git, GitHub, Vercel, Fly.io, Sentry, PostHog, WordPress, Elementor, WooCommerce, technical SEO

CERTIFICATIONS

Completed 5 June 2026. Credential ID: FE/23/88496905.

Codar Tech Institute — Frontend Development | 2025

EDUCATION

A-Level (IJMB), Al-Hikmah University | 2022

PROJECT PORTFOLIO

SchoolKit | Full-stack school-management SaaS

github.com/Voclain1/naija-class

- Built workflows for student records, attendance, assessments, report cards, fees and parent communication in a multi-tenant school-management platform.
- Implemented school-scoped PostgreSQL row-level security and role-based workflows; integrated Paystack payments and Redis/BullMQ background processing.
- Developed AI-assisted lesson planning and report comments with teacher review, alongside error monitoring and product analytics.

Next.js · NestJS · TypeScript · PostgreSQL · Prisma · Redis · Claude API

BetGenius | Sports-data and subscription platform

github.com/Voclain1/betgenius

- Built football-data features covering fixtures, live scores, standings and predictions using API-Football integrations.
- Implemented gated content tiers, Paystack checkout and an administrator review-and-publish workflow for AI-generated match analysis.

Next.js · TypeScript · Prisma · API-Football · Paystack

Oriri Properties | Real-estate website

github.com/Voclain1/oriri-properties

- Built property listing and statically generated detail pages with property-specific metadata, canonical URLs and enquiry components.
- Organised reusable UI components and typed property data to support consistent navigation and property discovery.

Next.js 15 · React 19 · TypeScript · Tailwind CSS

MomentumDesk | Revenue-operations application — in development

github.com/Voclain1/momentum-desk

- Established a Next.js and TypeScript application foundation with startup environment validation, dashboard preview and GitHub Actions CI.
- Implemented currency-aware money utilities using integer minor units and explicit ISO 4217 exponents, plus lint, type-check and unit-test commands.

Next.js 16 · TypeScript · Vitest · GitHub Actions

Light Travels | Travel and logistics website

github.com/Voclain1/lighttravels-website

- Created a seven-page travel website covering services, destinations, pilgrimage, corporate travel and contact information.
- Built a shared CSS design system, responsive navigation and progressive reveal animations.
